To Our Residents and Family Members:

Good Evening,

The team here at Beatitudes Health Care Center come to you with heavy hearts today to report that we lost one of our beloved residents last night. This individual had severe comorbidities and underlying medical conditions and was under the care of hospice. Unfortunately, they were not able to fight off the infection of COVID-19.

As stated in the previous communication, we ask for prayers of peace and comfort for the family and for our staff as they feel the loss of our residents deeply. Our residents that are served by us in our Health care Center are not only part of your family, but they are part of our Beatitudes family. We take our responsibility to care and protect them very seriously.

Test results are starting to come in for the over 400 staff who were part of the "Testing Blitz" Tuesday. We anticipate having all results by the end of the weekend. Once these results are in they will be shared in another email communication.

Please hold your loved ones, our residents, their families, our staff and leaders, our State, and our Country in your hearts and prayers. We can feel your strength and that is what holds us up on rough days like these.

We appreciate you all!

Blessings,

Teresa Borton RN
Administrator

Barbara Crivellaro RN
Director of Nursing

Cheryl Knupp
Senior VP of Health Service and Risk Management
